Title: Combustion Technology / Fired Equipment

Potential PDH: 40 Code: BTT061

Description:

Upon completion of this course, participants will be able to:

- Understand combustion basics
- Understand hardware and instrumentation of fired equipment
- · Make rough calculations for trouble shooting of field problems
- Optimize/balance proper operation and thermal efficiency of fired equipment

Outline:

- 1. Introduction
- 2. Combustion Theory
- 3. Burners
- 4. Atomization
- 5. Low NOx Burners
- 6. Furnaces
- 7. Air Preheat
- 8. Furnace Control and Safety
- 9. Furnace Tube Decoking
- 10. Refractory
- 11. Furnace Tube Failure
- 12. On-Line Chemical Cleaning
- 13. Trial for Ignition Time
- 14. Exercises
